

Home Removal or Conversion Disclosure (For FHA loans only)

I/We understand and agree that we intend to take the following action on the existing home on site.

_____ Existing home to be removed by the dealer/builder prior to the final inspection.

_____ Existing home will remain on the property and be converted to storage by the dealer/builder.

- The final Inspector (Engineer, RCI or CI) must state that the home has been converted to storage and the kitchen has been rendered inoperable and at a minimum the built in kitchen appliances have been removed
- The final Inspector (Engineer, RCI or CI) to confirm the home has been disconnected from all utilities with the exception of electric
- Kitchen cabinets do not need to be removed if the final inspector does not require it.
- Borrower is responsible for all personally property taxes that may be due on this unit.

I/We understand that one of these actions **must take place PRIOR** to the FHA Final Inspection

We also understand that if we are currently living in the home that will be removed or converted to storage, we will need to vacate the property and find temporary living arrangements PRIOR to final inspection being conducted. We will not be allowed to move into the new home until all inspections have been approved and the modification process has been fully completed.
